SUMMARY

Automation-focused IT Operations Engineer with 5+ years of experience in managing mission-critical systems in a high-availability banking environment. Skilled in automating operational processes, supporting troubleshooting and incident resolution, improving system reliability, and optimizing operational workflows to reduce manual effort and improve efficiency. Currently expanding in Python, UiPath, Linux, Git, Docker, Kubernetes, Ansible, API testing, CI/CD, and technical documentation.

WORK EXPERIENCE

IT Operation Support Automation – PT Bank Central Asia (BCA)

Nov 2020 - Jul 2026

- Performed root cause analysis (RCA) for workload anomalies and engineered long-term preventive solutions to minimize job failures.
- Supported end-to-end system upgrades, infrastructure migrations, and disaster recovery (DR) simulations to ensure continuous operation of batch environments.
- Partnered with cross-functional and application teams to streamline operational workflows and maximize system reliability.
- Orchestrated process optimization by converting repetitive manual operations into event-driven automated tasks, significantly reducing human error.
- Authored and maintained comprehensive technical documentation, standard operating procedures (SOPs), and operational guides to drive team-wide standardization.
- Coordinated cross-team IT operations for End-of-Year 2023 activities.

Optical Engineer Intern – PT. BANGTELINDO

Jul 2017 - Aug 2017

- Collaborated with senior network technicians in the PSB (Provisioning & Installation) division to deploy fiber optic cables and configure central network connections.
- Gained hands-on experience in telecommunications infrastructure by executing end-to-end optical network installations for IndiHome services.
- Supported the installation team by configuring network settings to the central exchange, ensuring successful service activation for customers.

EDUCATION

Bachelor of Telecommunication Engineering

2018–2020

Telkom University

- Overall GPA 3.65/4.
- Practical Assistant of Broadband Switching Engineering Laboratory.
- Published Performance Comparison of Genetic and Greedy Algorithms in Underlay Device-to-Device Communication in EMITTER International Journal of Engineering Technology 2020.
- Cybersecurity Digitalent FGA Kominfo 2019 Internship Program Participant.
- Became 3rd winner at the ICStar Hackathon 2020.

Diploma of Telecommunication Engineering

2015–2018

Electronic Engineering Polytechnic Institute of Surabaya

- Overall GPA 3.53/4.
- Senior staff of the Ministry of Foreign Affairs, BEM PENS (2016–2017).
- General treasurer of the Banten student forum in Surabaya (Forda Baduy).

LANGUAGES

- Bahasa Indonesia (Native)
- English (Limited Working Proficiency)

PROJECTS

- Contributed to upgrade of 2,000+ agents across Production & Development environments.
- Executed DR failover validation across Control-M Application & Database environments, ensuring high availability and business continuity.
- Configured and managed batch application setup in a newly provisioned Control-M environment to support infrastructure segregation in compliance with OJK regulations, ensuring secure, stable, and reliable job scheduling across isolated systems.

PERSONAL PROJECTS

- **RPA:** Enterprise Invoice Processing Automation with UiPath Orchestrator.
- **DevOps:** Built a local DevOps homelab environment to simulate real-world infrastructure and deployment workflows using Docker, Kubernetes, and Ansible.

CORE COMPETENCIES & TECHNICAL SKILLS

Core Competencies

- IT Support & Service Desk
- IT Operations & Infrastructure Support
- Enterprise Application Support
- Technical Documentation
- Process Automation
- Business Process Improvement
- Root Cause Analysis
- Incident Management

Technical Skills

- **Programming Language:** Python, Java, VB, Bash
- **Systems:** Linux, Windows
- **Networking:** TCP/IP, DNS, AD
- **Troubleshooting & Incident Management:** Root cause analysis (RCA), issue resolution, Jira
- **Tools:** VS Code, Git, Postman, UiPath(RPA), Power BI, Jenkins, Vercel, Docker, Kubernetes, Ansible
- **Database Management:** MySQL, Oracle, PostgreSQL, MSSQL, MongoDB
- **Testing Framework:** pytest, Selenium, Playwright
- **Documentation:** Ms. SharePoint, Ms. Visio, draw.io
